

DATA ACQUISITION RECORDER

No Lab or Maintenance Facility Should Be Without A&D's RA Series of Data Acquisition Recorders. Verify & Print Data Before Leaving Test Site.

Applications

Electric Power Analysis

Product Safety Testing

Dynamometer & Test Track
Data Correlation

Strain Gage & Strain
Transducer Data Collection

Engine Sensor Pick-Up

Impact Testing

Field Maintenance

Heavy Duty Equipment Testing

Key Features

- Multiple Interfaces: LAN, USB, RS-232C
- Internal HDD, SSD or External Memory Storage
- Built-In High-Resolution Thermal Printer

Plug-In Signal Conditioning Modules

- Simultaneously Record Data Up to 16 or 32 Channels with 1 MSa/sec Total Sampling Speed
- Capture Timing & Events
- Interfaces with all Common Transducers
 - Vibration
 - Temperature
 - Voltage
 - Acceleration
 - Current
 - F/V
- Calculate & Display Values
 - FFT
 - RMS

The A&D RA Series includes the former Soltec models of TA220-2300, TA220-2300A, TA220-2800, TA220-2800A.
